THIS CHANGE ORDER PROVIDES FOR (Use additional pages as needed):

This change order provides for:

Compensating the contractor for additional costs of footing excavation and related conduit trenching for sign structure SS1-A at Sta. "A" 235 +78 Rt. due to the presence of subsurface rock in accordance with Section 4-1.06, "Differing Site Conditions (23 CFR 635.109)," of the *Standard Specifications*.

Reason for Change:

During potholing to confirm the location of an adjacent utility line, subsurface rock was encountered. The contract's log of test borings and the Informational Handout provide no indication that rock at any depth would be present at this location. After a review of the original boring data, the geotechnical engineer, Janet Whitney, confirmed that the boring log for this location is incorrect and should have indicated subsurface rock.

Method of Payment:

The additional compensation will be paid for as a payment adjustment at force account.

The geotechnical engineer, project engineer, and construction engineer agreed with this change.

Time Adjustment:

A determination of a time adjustment will be deferred until completion of the excavation and trenching work specified in this change order.
